A Total Solution For Minimum Wire Breaks

SALIENT FEATURES

- PBI Metals copper rod is manufactured using state of the art continuously cast technology and has a diameter of 8 mm.
- Well controlled oxygen level.
- Uniform microstructure with smooth surface.
- Extremely low surface oxide levels due to effective alcohol pickling.
- Specially treated to maintain the original shine by preventive non oxidizing treatment.
- Exceeds ASTM B49 Requirements of Minimum Elongation : 30 % and Conductivity : 100% IACS

STANDARD PACKING

The rod which is in coil form is strapped to a wooden pallet using metallic strings and provided with additional HDP packing protection.

Coil Shape

Orbital

Coil Size

3 tons custom size's on order

Packaging

Palletized

Eye-to-the-sky

HDP Wrap

END USE APPLICATION

- **Automotive Wire**
- **Enameled Wire**
- **Communication Cable**
- **Power Cable**
- **Strip Flat Wire**
